

Student Roster Upload Guide

How to prepare and upload your pilot cohort – about 10 minutes.

Use the template file `roster-template.csv` in this pack

What we need (and what we don't)

The platform follows data-minimisation: we ask only for what is needed to create accounts and route students to the right content. **Do not** include home addresses, medical information, SEND flags, or any data beyond the columns below.

The columns

COLUMN	REQUIRED?	EXAMPLE	NOTES
first_name	Yes	Aisha	—
last_name	Yes	Al-Thani	—
email	Yes	aisha.althani@school.edu.qa	School email preferred
year_group	Yes	Year 11	Year 7–13
exam_board	Recommended	Edexcel	AQA / Edexcel / OCR / Eduqas / WJEC / Cambridge
date_of_birth	For under-16s	2010-09-14	YYYY-MM-DD; drives the age-gate & parental-consent flow
parent_guardian_email	For under-16s	parent@example.com	Used for the consent loop + weekly progress email
class	Optional	11-Set-1	If provided, we auto-create class groupings

Example rows

first_name, last_name, email, year_group, exam_board, date_of_birth, parent_guardian_email, class
Aisha, Al-Thani, aisha.althani@school.edu.qa, Year 11, Edexcel, 2010-09-14, parent1@example.com, 11-Set-1
James, Okoro, james.okoro@school.edu.qa, Year 11, Edexcel, 2010-04-02, parent2@example.com, 11-Set-2
Lena, Hoffmann, lena.hoffmann@school.edu.qa, Year 10, AQA, 2011-11-20, parent3@example.com, 10-Set-3

How to upload

1. Open `roster-template.csv` from this pack in Excel or Google Sheets.
2. Fill one row per student. Keep the header row exactly as provided.
3. Save as CSV (UTF-8).
4. At the Week-1 kickoff, we upload it together — or send it ahead via the secure link we provide (do not email a student roster as a plain attachment).
5. Accounts activate automatically; under-16 accounts wait for the parental-consent loop to complete before going live.

ALREADY HAVE A MANAGEMENT INFORMATION SYSTEM?

For annual deployments above ~500 students we can take a one-way export from iSAMS, Engage, Bromcom or Arbor instead of a manual CSV. For a pilot, the CSV is simplest and avoids an integration dependency.

SENDING THE ROSTER SECURELY

A student roster is personal data. Please don't email it as a plain attachment. We provide a secure upload link, or we upload it together on the kickoff screen-share. The file is processed under the DPA (Document 02) and retained per the schedule (Document 05).
